Please reference GIPS Report in the appendix. Returns for periods exceeding 12 months are annualized. Past performance is no guarantee of future results.

# Risk Adjusted Returns

## Dolan McEniry Core Plus Sharpe Ratio Performance Versus Key Benchmarks

Data September 30, 1997 through December 31, 2025

- Dolan McEniry Core Plus has high risk adjusted returns versus US Fixed Income Indexes
- Dolan McEniry Core Plus performs well versus US Fixed Income Indexes with a low standard deviation
- Since inception, Dolan McEniry Core Plus returned 5.73% (net) versus 6.09% for the Bloomberg US Corporate High Yield Ba/B and 6.32% for the Bloomberg US Corporate High Yield

	Standard Deviation	Return
Dolan McEniry Core Plus	3.78%	5.73%
Bloomberg US Aggregate	4.08%	4.12%
Bloomberg US Corporate High Yield	8.73%	6.32%
Bloomberg US Corporate High Yield Ba/B	7.87%	6.09%
Bloomberg US Corporate Investment Grade	6.00%	4.92%
Bloomberg US Intermediate Credit	4.07%	4.64%
Bloomberg US Mortgage Backed Securities	3.70%	3.94%

Dolan McEniry Core Plus inception date is 09/30/1997. eVestment Alliance (eA) is an innovative, web-based provider of comprehensive investment information and analytic technology. eVestment Alliance collects information directly from investment management firms and other sources believed to be reliable. The above results, as reported by eVestment Alliance as of 12/31/2025. Sharpe Ratio is a highly accepted measure for calculating risk-adjusted return and calculates the average return earned in excess of the risk-free rate per unit of volatility or total risk. A manager taking on risk, instead of investing in cash, is expected to generate higher returns and Sharpe measures how well the manager generated returns with that risk. It is a measurement of efficiency utilizing the relationship between annualized risk-free return and annualized standard deviation. The higher the Sharpe Ratio, the greater efficiency produced by the manager. Standard Deviation is defined as a measure of the average deviations of a return series from its mean; often used as a risk measure. A large standard deviation implies that there have been large swings or volatility in the manager's return series. The statistics do not reflect a representation of any one client's experience. Information shown is supplemental to GIPS Report and disclosures, which are included at the end of this presentation. Cash allocation is not included in the performance returns and this could impact returns. A complete list and description of composites is available upon request. Returns for periods exceeding 12 months are annualized. Past performance is no guarantee of future results. Please see composite disclosures.

# Upside Downside Capture

## Dolan McEniry Core Plus Upside Downside Capture relative to Benchmarks

Data September 30, 1997 through December 31, 2025

Dolan McEniry Core Plus inception date is 09/30/1997. eVestment Alliance (eA) is an innovative, web-based provider of comprehensive investment information and analytic technology. eVestment Alliance collects information directly from investment management firms and other sources believed to be reliable. The above results, as reported by eVestment Alliance as of 12/31/2025. Upside Capture is a measure of the manager's performance in up markets relative to the market itself. A value of 110 suggests the manager performs ten percent better than the market when the market is up during the selected time period. The return for the market for each quarter is considered an up market if it is greater than or equal to zero. Downside Capture is a measure of the manager's performance in down markets relative to the market itself. A value of 90 suggests the manager's loss is only nine tenths of the market's loss during the selected time period. A market is considered down if the return for the benchmark is less than zero.

\*The average downside and upside capture presented is relative to the above benchmarks. Past performance is no guarantee of future results. The data above is net of fees. The statistics do not reflect a representation of any one client's experience. This data is being presented as supplemental information to the full GIPS Report located in the appendix.

# Our Strategy and Process

# Investment Strategy and Process

## Fixed income value investors

Quality credits  
Wide spreads

## Credit analysis is our core strength

Free cash flow based  
Wide margins of safety

## In-house research/ideas

No Wall Street reports  
No reliance on rating agencies

## Vigilant about our circle of competence

Consumer, industrial, service, low tech  
No banks or broker dealers

## Lender's approach to fixed income markets

Long-term lending vs. short-term trading

## Intermediate duration manager

Average duration of 4 years  
No speculation on interest rates

## Concentrated portfolios of 40-45 issuers

Not a proxy for any benchmark

1. Composite dispersion is not presented for years where there are 5 or fewer portfolios in the composite for the full year because it is not statistically meaningful.

2. The 3-year ex-post standard deviation is not required to be presented for periods prior to 2011 or when 36 monthly composite returns are not available. Monthly gross composite returns are used in the calculation.

3. Returns are calculated and presented as net of maximum annual advisory fee, 2.50%, plus the maximum product manager fee, 0.40%.

## Dolan McEniry Core Plus

### Compliance Statement

Dolan McEniry Capital Management, LLC claims compliance with the Global investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Dolan McEniry Capital Management, LLC has been independently verified for the periods September 30, 1997 through December 31, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Dolan McEniry Core Plus Composite has had a performance examination for the periods September 30, 1997 through December 31, 2024. The verification and performance examination reports are available upon request.

\*Dolan McEniry Core Plus inception date is September 30, 1997; 1997 is a three month period.

### Definition of the Firm

Dolan McEniry Capital Management, LLC is an independent investment management firm established in 1997 and is an SEC registered investment adviser. Registration of an adviser does not imply a certain level of skill or training. Dolan McEniry Capital Management, LLC manages fixed income accounts utilizing Dolan McEniry's specific strategies for institutional and individual clients.

### Definition of the Composite

Dolan McEniry Core Plus is a fixed income investment product benchmarked against the Bloomberg U.S. Aggregate Index or the Bloomberg U.S. Intermediate Credit Index. In this strategy, the firm utilizes U.S. corporate investment grade, U.S. corporate high yield and U.S. Treasury securities. Dolan McEniry Core Plus is approximately 75% U.S. corporate investment grade bonds and 25% U.S. corporate high yield bonds. The Dolan McEniry Core Plus Composite was established and created on September 30, 1997.

Dolan McEniry began including accounts that are valued under \$1,000,000 USD in the composite as of December 31, 2009. Prior to December 31, 2009 an account had to have a value over \$1,000,000 USD to be included in the composite.

Non-fee paying accounts represented less than 2% of the composite assets for all periods shown.

### Benchmark

Bloomberg U.S. Aggregate Index

The Index is a broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. The Index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS, and CMBS (agency and non-agency).

### Bloomberg U.S. Intermediate Credit Index

The Index is the intermediate component of the Bloomberg U.S. Credit Index. The Bloomberg U.S. Credit Index measures the investment grade, US dollar-denominated, fixed-rate, taxable, corporate and government –related bond markets. It is composed of the US Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supranationals, and local authorities.

Intra-month cash flows from interest and principal payments contribute to monthly Index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that Index results over two or more months reflect monthly compounding. One cannot invest directly in an Index.

### List of Composites

A complete listing and description of all composites, limited distribution pooled funds, and broad distribution pooled funds is available upon request.

### Dispersion

The dispersion of annual returns is measured by the asset weighted standard deviation across gross portfolio returns represented within the composite for the full year.

### Performance

Gross and net performance is net of all trading expenses. Composite Net Returns are presented net of actual investment management fees. Composite Net of Maximum Annual Advisory and Product Fee returns are calculated by subtracting 1/12th of 2.90% from the monthly gross return. 2.90% represents the maximum wrap fee that a sponsor may charge clients seeking investment management services in the designated strategy. Wrap fees may include, among others, custodial fees, portfolio management fees, administrative fees and transactional fees. The maximum product fee Dolan McEniry charges for management of a client portfolio is 40 basis points. The maximum wrap fee charged by a wrap platform is 250 basis points annually. All returns are based in U.S. dollars and computed using a time-weighted total return. Composite returns are asset weighted individual portfolios computed monthly. Returns for periods exceeding 12 months are annualized. The Dolan McEniry Core Plus Composite includes both price performance and coupon/dividend income as do the Bloomberg U.S. Aggregate Index and Bloomberg U.S. Intermediate Credit Index. Results reflect the reinvestment of dividends, interest and other earnings. The Dolan McEniry performance reflected above is not necessarily indicative of future results and, as a composite of different accounts, does not necessarily reflect the exact performance of any specific account. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

### Fee Schedule

Dolan McEniry Capital Management, LLC's standard fee is 0.40% (40bps) of assets under management.

### Disclaimer

Past performance is no guarantee of future results. Investing is speculative and involves risk, including the possible loss of principal. Historical returns should not be used as the primary basis for investment decisions. This product should be considered based on the suitability of its strategy in relation to return objectives, risk tolerances, and other investments. Although the statements of fact and data in this document have been obtained from or based upon sources believed to be reliable, Dolan McEniry Capital Management, LLC makes no warranties or representation as to their accuracy, correctness, or reliability, and assumes no liability or responsibility for any omissions or errors.

## Additional Indexes

### Bloomberg U.S. Corporate Index

The Bloomberg US Corporate Bond Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD-denominated securities publicly issued by US and non-US industrial, utility and financial issuers. The US Corporate Index is a component of the US Credit and US Aggregate Indices, and provided the necessary inclusion rules are met, US Corporate Index securities also contribute to the multi-currency Global Aggregate Index.

### Bloomberg U.S. Corporate High Yield Index

The Bloomberg US Corporate High Yield Bond Index measures the USO-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on the indices' EM country definition, are excluded. The US Corporate High Yield Index is a component of the US Universal and Global High Yield Indices.

### Bloomberg U.S. MBS Index

The Bloomberg US Mortgage Backed Securities (MBS) Index tracks agency mortgage backed pass-through securities (both fixed-rate and hybrid ARM) guaranteed by Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). The index is constructed by grouping individual TBA-deliverable MBS pools into aggregates or generics based on program, coupon and vintage. Introduced in 1985, the GNMA, FHLMC and FNMA fixed-rate indices for 30- and 15-year securities were backdated to January 1976. May 1977. and November 1982, respectively.

### Bloomberg U.S. Treasury Index

The index is the U.S. Treasury component of the Bloomberg U.S. Government Index. The Bloomberg U.S. Treasury Index measures the public obligations of the U.S. Treasury with a remaining maturity of one year or more.

### Bloomberg U.S. Corporate High Yield Ba/B Index

The Index is the Ba/B component of the Bloomberg US Corporate High Yield Index. The Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Bonds from issuers with an emerging markets country of risk, based on the indices' EM country definition, are excluded. The corporate sectors include industrial, financial institutions, and utility. Bonds must have at least one year until final maturity.

### S&P 500 Index

The S&P 500® is widely regarded as the best single gauge of large-cap U.S. equities and serves as the foundation for a wide range of investment products. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization.

Intra-month cash flows from interest and principal payments contribute to monthly Index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that Index results over two or more months reflect monthly compounding. One cannot invest directly in an Index.

# Meet Dolan McEniry

## Daniel D. Dolan, Jr.

Daniel founded Dolan McEniry in 1997 following a 16 year career in the financial services industry. Daniel previously worked with Morgan Stanley and Salomon Brothers after receiving a B.A. from Lake Forest College in 1980.

At Dolan McEniry, Daniel directs the investment strategy, risk management and strategic activities of the firm with Roger McEniry. Also, Daniel is responsible for client relations, new business development, and the overall administrative management of the firm.

Daniel serves as Vice Chair of the Board of Directors for the Shirley Ryan AbilityLab and Chairman of the Keystone Board for the Shirley Ryan AbilityLab. Daniel serves as a Member of the Board of Directors for US Squash and a Member of the US Squash Foundation Board. Finally, Daniel serves as a Member of the Board of Trustees of Lake Forest College and is past Chairman of the Board of Directors for MetroSquash.

# Meet Dolan McEniry

## Roger S. McEniry

Roger S. McEniry is a Managing Member of Dolan McEniry. Roger directs the investment and strategic activities of the firm and oversees security selection, risk management, and credit analysis, among his other responsibilities. Prior to joining the firm in 2001, Roger spent sixteen years as a partner at a Chicago private equity firm and, before that, was with Citibank in Chicago.

Mr. McEniry is a graduate of Deerfield Academy, Williams College, and the University of Michigan Graduate School of Business. He is a trustee of Rush University Medical Center and a member of the Chairman's Council of the Daniel Murphy Scholarship Fund and is the past president of its board of directors. He is Trustee Emeritus of Deerfield Academy and served as Co-Chair of its Imagine Deerfield Capital Campaign.

# Meet Dolan McEniry

## Stephen M. Schubert

A member of the Dolan McEniry team since 1998, Stephen currently serves as a Managing Director. He is a member of the Investment Team and is responsible for client relations, new business development. Steve ran the Portfolio Management & Trading team for 15 years before transitioning into client and business development. Stephen worked previously with Suntrust Bank and Merrill Lynch, and remains actively involved with the University Club of Chicago. Stephen received his Bachelor of Science degree in Finance from Michigan State University where he competed on the varsity tennis team and graduated with honors.

## Katheryn G. Calderon

Katheryn joined Dolan McEniry in 2005 and is now Senior Managing Director. Katheryn oversees Business Development and Client Services as well as the daily implementation, management, and oversight of the firm. Her previous experience includes work with the Chicago Mercantile Exchange as a Trading Clerk for a Eurodollar Options Trader. Katheryn holds a Bachelor of Arts in Psychology from Georgetown University.

## C. Schaffer Degen, CFA

A member of the Dolan McEniry team since 2012, Schaffer currently serves as a Managing Director responsible for client relations and new business development. He is a member of Dolan McEniry's Investment Committee and previously served as co-head of the investment team. Schaffer graduated from Miami University of Ohio in 2010 with a B.S. in Business and a major in Finance. Before joining Dolan McEniry, Schaffer worked at Lenox Advisors, Inc.
