Positive Impact Strategy Composite

BENCHMARK
ICE BofA 1-12 Year Municipal Securities Index

INCEPTION
Oct 1, 2018

STRATEGY AUM
$58.51M

HIGHLIGHTS

- Tailor portfolios to meet the client's specific liquidity needs and tax objectives
- Prudently manage risk by diversifying across a number of high-quality municipal issuers
- Unlimited access to members of APA's Investment Team
- Active management of portfolio holdings
- Can provide state preference for clients that reside in certain states

ADDITIONAL INFORMATION

In addition to APA's typical credit research process, further review of use of proceeds, and the Environmental, Social and Governance (ESG) profile of the issuer is considered

OBJECTIVE

APA's Positive Impact Tax-Exempt Strategy seeks to provide a diversified exposure to high-quality tax-exempt bonds that meet APA's defined Environmental, Social, or Governance (ESG) criteria. Through sustainable or impact investing, the strategy looks to positively influence the environment and society while seeking to maximize returns. Bonds selected for this strategy have maturities within 1 to 20 years.

INVESTMENT PROCESS

- This strategy primarily invests in high-quality municipal bonds that are certified green-labeled or that finance climate-aligned assets
- Bonds selected meet APA's standard after careful evaluation of multiple factors, including but not limited to the underlying credit fundamentals, transparency in the use of proceeds, and disclosure of data
- We combine our fundamental research with an investment process that emphasizes both risk management and relative-value investing in an attempt to achieve competitive risk-adjusted returns while also supporting positive social and environmental impact goals in an attempt to achieve competitive risk-adjusted returns while also supporting positive social and environmental impact goals
- Provide ongoing internal analysis of credit quality and underlying fundamentals

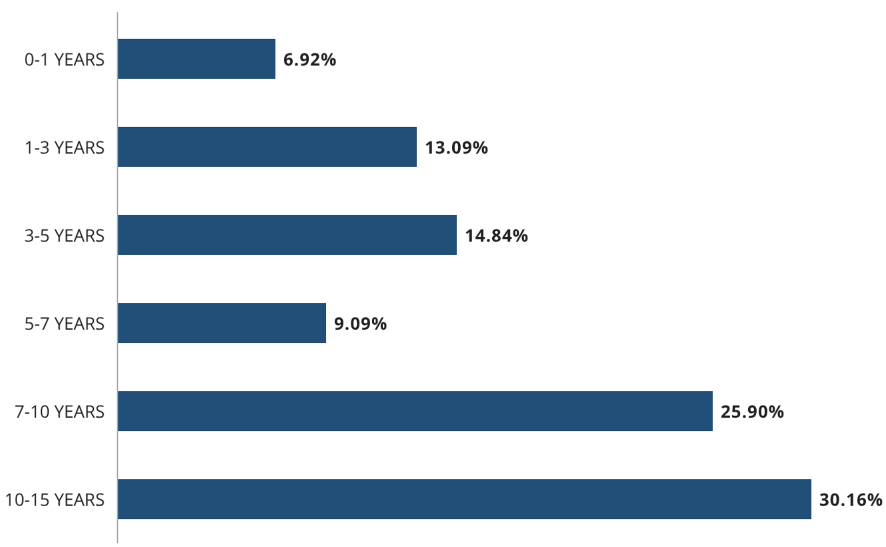
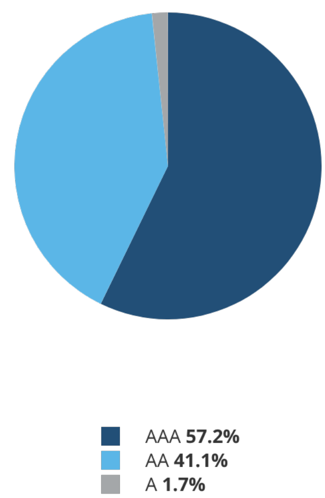
MATURITY BREAKDOWN AS OF 12/31/25



CREDIT QUALITY AS OF 12/31/25



MARKET COMMENTARY FOR 12/31/25

The fourth quarter closed out a volatile yet resilient year for municipals. Following a September–October rally, the market held steady into year-end even as the Fed's third 25-basis-point cut brought rates to 3.50%–3.75%. Full-year performance for the Bloomberg Municipal Bond Index reached 4.3%, outperforming six of the prior 10 years.

Supply was a defining theme. 2025 issuance approached a record $580B, with expectations for a heavy calendar in early 2026. Taxable muni issuance declined 12%, contributing to a 7.8% return. If short rates remain rangebound and advance refunding becomes economical, taxable issuance could rebound, adding to overall supply.

The yield curve remains steep, creating opportunities to capture incremental taxable-equivalent yield. As of year-end, 20-year AAA munis offered roughly 185 bps over comparable Treasuries, highlighting value in the long end. We maintained a modified barbell structure to balance downside protection with yield pickup.

Credit trends were mixed. In 2025, the major rating agencies downgraded $187B in debt, led by school districts at $38B, while upgrades totaled $364B—skewed by a handful of benchmark credits. December highlighted credit risk as Brightline Train Florida LLC's senior bonds were downgraded five notches, with S&P now expecting default by early 2027.

In our view, a steep curve, robust supply, and widening credit dispersion reinforce the importance of active management. APA's tax-efficient approach seeks to capture attractive taxable-equivalent yields, preserve quality, and enhance income as market dynamics evolve through 2026.

GIPS® REPORTS

APA Positive Impact Tax-Exempt Composite

Past performance is not indicative of future results. This material is not financial advice or an offer to sell any product. The performance and portfolio characteristics shown relate to the APA Positive Impact Tax-Exempt Composite (the "Composite").

Composite Description: Asset Preservation Advisors ("APA") uses a fixed income strategy that is sector-specific, generally focusing on issuers which APA believes provide environmental sustainability, positive social impact, or promote sound regulatory measures. APA typically avoids issuers that do not broadly conform with ESG client values, such as revenues tied to tobacco, alcohol, or casinos. However, APA may invest in an issuer whose use of proceeds for a particular bond issue gears towards a positive social and environmental impact, rather than the issuer's ESG values as a whole. All bonds purchased for separate managed accounts under APA's Positive Impact Tax-Exempt Strategy will ultimately be determined as appropriate according to the opinions of APA.

Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market predicaments at the time of investment. APA reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs. The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed may not represent an account's entire portfolio, and in the aggregate may represent only a small percentage of an account's portfolio holdings. It should not be assumed that any of the security transactions, holdings or sectors discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

APA is an investment adviser registered with the U.S. Securities and Exchange Commission. Registration does not imply a certain level of skill or training. More information about the advisor including its investment strategies and objectives can be obtained by visiting www.assetpreservationadvisors.com. A list of composite descriptions is available upon request.

The Composite contains fully discretionary, fee-paying accounts with a minimum asset level of $1MM. For comparison purposes, the Composite is measured against the ICE BofA 1-12 Year US Municipal Securities Index. The ICE BofA 1- 12 Year US Municipal Securities Index is a subset of ICE BofA US Municipal Securities Index including all securities with a remaining term to final maturity less than 12 years. The ICE BofA US Municipal Securities Index tracks the performance of US dollar denominated investment grade tax-exempt debt publicly issued by US states and territories, and their political subdivisions, in the US domestic market. Qualifying securities must have at least one-year remaining term to final maturity, at least 18 months to final maturity at the time of issuance, a fixed coupon schedule and an investment grade rating (based on an average of Moody's, S&P and Fitch). Minimum size requirements vary based on the initial term to final maturity at time of issuance. Securities with an initial term to final maturity greater than or equal to one year and less than five years must have a current amount outstanding of at least$10 million. Securities with an initial term to final maturity greater than or equal to five years and less than ten years must have a current amount outstanding of at least $15 million. Securities with an initial term to final maturity of ten years or more must have a current amount outstanding of at least $25 million. The call date on which a pre-refunded bond will be redeemed is used for purposes of determining qualification with respect to final maturity requirements. Original issue zero coupon bonds are included in the Index. Taxable municipal securities, 144a securities and securities in legal default are excluded from the Index. The volatility (standard deviation) of the Composite may be greater than that of the index. It is not possible to invest in this index. Leverage, derivatives or short positions are not used in this Composite. The annual composite dispersion is an equal-weighted standard deviation of annual returns for the accounts in the composite for the entire year. For this Composite, APA defines a significant cash flow as greater than or equal to 30% of an account's market value at the beginning of the measurement period. Accounts removed from the composite due to significant cash flows will be excluded until the account meets the composite's requirements. This significant cash flow policy has been applied for the entire history of the Composite. Effective May 2019 if 80% or more of the external cash flow's value is comprised of in-kind bonds that meet requirements of the strategy, that account is not removed from the Composite. Interest rate, credit and tax risks may be material risks of the APA Positive Impact Tax-Exempt Composite. The U.S. Dollar is used to express performance. The APA Positive Impact Tax-Exempt Composite was created August 31, 2019. The Composite's inception date is October 1, 2018.

Asset Preservation Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Asset Preservation Advisors, LLC has been independently verified for the periods January 1, 2004 through December 31, 2024. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

The three-year annualized standard deviation measures the variability of the composite using gross returns, and the benchmark returns over the preceding 36-month period.

Returns are presented gross and net of investment advisory fees and include the reinvestment of all income. Gross returns will be reduced by trading expenses that may be incurred in the management of the account. Net-of-fee returns were calculated by deducting a model management fee of 1/12th of the highest management fee of .35% from the monthly gross composite return. The net return derived from a pure gross return portfolio does not reflect the deduction of transaction costs. The Firm's policies for valuing portfolios, calculating performance, and preparing GIPS reports are available upon request.

The fee schedule for APA's investment advisory services for separately managed accounts in the APA Positive Impact Tax-Exempt Composite is 0.35%. Actual investment advisory fees incurred by clients may vary. A complete description of APA's fee schedule can be found in Part 2 of its FORM-ADV which is available at www.assetpreservationadvisors.com or by calling (404) 261-1333.

APA Positive Impact Tax-Exempt Composite

Past performance is not indicative of future results. This material is not financial advice or an offer to sell any product. The performance and portfolio characteristics shown relate to the APA Positive Impact Tax-Exempt Composite (the "Composite").

Composite Description: Asset Preservation Advisors ("APA") uses a fixed income strategy that is sector-specific, generally focusing on issuers which APA believes provide environmental sustainability, positive social impact, or promote sound regulatory measures. APA typically avoids issuers that do not broadly conform with ESG client values, such as revenues tied to tobacco, alcohol, or casinos. However, APA may invest in an issuer whose use of proceeds for a particular bond issue gears towards a positive social and environmental impact, rather than the issuer's ESG values as a whole. All bonds purchased for separate managed accounts under APA's Positive Impact Tax-Exempt Strategy will ultimately be determined as appropriate according to the opinions of APA.

Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market predicaments at the time of investment. APA reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs. The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed may not represent an account's entire portfolio, and in the aggregate may represent only a small percentage of an account's portfolio holdings. It should not be assumed that any of the security transactions, holdings or sectors discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

APA is an investment adviser registered with the U.S. Securities and Exchange Commission. Registration does not imply a certain level of skill or training. More information about the advisor including its investment strategies and objectives can be obtained by visiting www.assetpreservationadvisors.com. A list of composite descriptions is available upon request.

The Composite contains fully discretionary, fee-paying accounts with a minimum asset level of $1MM. For comparison purposes, the Composite is measured against the ICE BofA 1-12 Year US Municipal Securities Index. The ICE BofA 1- 12 Year US Municipal Securities Index is a subset of ICE BofA US Municipal Securities Index including all securities with a remaining term to final maturity less than 12 years. The ICE BofA US Municipal Securities Index tracks the performance of US dollar denominated investment grade tax-exempt debt publicly issued by US states and territories, and their political subdivisions, in the US domestic market. Qualifying securities must have at least one-year remaining term to final maturity, at least 18 months to final maturity at the time of issuance, a fixed coupon schedule and an investment grade rating (based on an average of Moody's, S&P and Fitch). Minimum size requirements vary based on the initial term to final maturity at time of issuance. Securities with an initial term to final maturity greater than or equal to one year and less than five years must have a current amount outstanding of at least$10 million. Securities with an initial term to final maturity greater than or equal to five years and less than ten years must have a current amount outstanding of at least $15 million. Securities with an initial term to final maturity of ten years or more must have a current amount outstanding of at least $25 million. The call date on which a pre-refunded bond will be redeemed is used for purposes of determining qualification with respect to final maturity requirements. Original issue zero coupon bonds are included in the Index. Taxable municipal securities, 144a securities and securities in legal default are excluded from the Index. The volatility (standard deviation) of the Composite may be greater than that of the index. It is not possible to invest in this index. Leverage, derivatives or short positions are not used in this Composite. The annual composite dispersion is an equal-weighted standard deviation of annual returns for the accounts in the composite for the entire year. For this Composite, APA defines a significant cash flow as greater than or equal to 30% of an account's market value at the beginning of the measurement period. Accounts removed from the composite due to significant cash flows will be excluded until the account meets the composite's requirements. This significant cash flow policy has been applied for the entire history of the Composite. Effective May 2019 if 80% or more of the external cash flow's value is comprised of in-kind bonds that meet requirements of the strategy, that account is not removed from the Composite. Interest rate, credit and tax risks may be material risks of the APA Positive Impact Tax-Exempt Composite. The U.S. Dollar is used to express performance. The APA Positive Impact Tax-Exempt Composite was created August 31, 2019. The Composite's inception date is October 1, 2018.

Asset Preservation Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Asset Preservation Advisors, LLC has been independently verified for the periods January 1, 2004 through December 31, 2024. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

The three-year annualized standard deviation measures the variability of the composite using gross returns, and the benchmark returns over the preceding 36-month period.

Returns are presented gross and net of investment advisory fees and include the reinvestment of all income. Gross returns will be reduced by trading expenses that may be incurred in the management of the account. Net returns were calculated by subtracting the highest applicable wrap fee (2.55% on an annual basis, or .2125% monthly) on a monthly basis from the gross composite monthly return. The Firm's policies for valuing portfolios, calculating performance, and preparing GIPS reports are available upon request.

The fee schedule for APA's investment advisory services for separately managed accounts in the APA Positive Impact Tax-Exempt Composite is 0.25%. Actual investment advisory fees incurred by clients may vary. A complete description of APA's fee schedule can be found in Part 2 of its FORM-ADV which is available at www.assetpreservationadvisors.com or by calling (404) 261-1333. A list of pooled fund descriptions for limited distribution pooled funds is available upon request.

ICE BofA 1-12 Index	5.04%	1.25%	NA	2.40%

1 Composite Gross Results for 2018 through 2025 are supplemental information. The returns are a mix of pure gross returns that do not reflect the deduction of transaction costs and gross returns that do reflect the deduction of transaction costs.

2 Composite and benchmark information presented from October 1, 2018 through December 31, 2018.

3 Utilizes Gross Returns for Composite Dispersion calculation.

4 Calculated net of highest wrap fee across marketed wrap fee sponsors. Wrap fees can vary by sponsor. Please reach out to your sponsor for more information about fees.
